

Ben Bubnick

DATA GOVERNANCE · DATA QUALITY · METADATA STRATEGY

 bubnicbf |  benbubnick

Summary

Data governance and data management leader with 10+ years of experience building trusted, analytics-ready data assets across regulated healthcare, insurance, and enterprise data environments. Experienced in data standards, quality controls, source-to-target rules, metadata practices, audit checkpoints, operational playbooks, and stakeholder alignment. Hands-on background in Snowflake, dbt, AWS, Azure, SQL, Python, and large-scale data platforms, with a record of translating ambiguous source-system complexity into governed data models, reusable standards, measurable quality checks, and business-ready documentation.

Core Skills

Governance *Governance Frameworks, Critical Data Elements, Quality Rules, Classification, Stewardship, Source-to-Target Mapping, Data Contracts, Business Glossaries, Data Dictionaries, Lineage*
Compliance *HIPAA, HITRUST Readiness, Privacy, Access Controls, Retention Support, Audit Logs, Reconciliation, Schema Drift, Root Cause Analysis*
Platforms *Snowflake, dbt, SQLMesh, AWS, Azure Data Factory, Azure Synapse, PostgreSQL, Hadoop/HDFS, SQL, Python, CI/CD Validation, Referential Integrity, Exception Handling*
Leadership *Stakeholder Management, Operating Cadence, Requirements Translation, Cross-Functional Delivery, Standards Development, Playbooks, Mentoring, Change Enablement*

Experience

GrowData Analytics

DATA CONSULTANT

Oct. 2025 - Jun. 2026

- Led governance-oriented healthcare data integration across source analysis, data modeling, data quality, identity resolution, and documentation.
- Defined source-to-target standards for null handling, lifecycle fields, sentinel dates, key structures, and source-specific variation.
- Designed core domain models for organization, office, caregiver, patient, and crosswalk entities to create consistent enterprise data assets.
- Established data quality controls covering row counts, duplicates, nulls, referential integrity, reconciliation, and exception handling.
- Partnered with stakeholders to resolve source ambiguity, document mapping logic, clarify ownership, and translate business needs into governed data assets.

Health Data Movers

DATA CONSULTANT

Mar. 2025 - Jul. 2025

- Built reusable Snowflake/SQLMesh onboarding framework with governed model patterns, data contracts, CI checks, and promotion gates.
- Established auditability controls including row-count parity checks, schema drift alerts, reconciliation logs, and deterministic rerun procedures.
- Standardized transformation logic across clients to reduce variation and improve consistency of governed data delivery.
- Created integration playbooks and technical governance specifications that improved vendor onboarding, delivery predictability, and traceability.

Arkos Health

SENIOR DATA ANALYST

Jun. 2023 - Jan. 2025

- Helped stand up a governed AWS data lake with dbt workflows, Git-based change control, metadata reporting, documentation, and production monitoring.
- Authored internal standards and documentation that reduced onboarding time and improved consistency across the analytics team.
- Implemented monitoring, alerting, failure taxonomies, and runbooks to improve reliability and operational accountability.
- Improved cross-departmental alignment through stakeholder feedback, goal-setting, mentoring, code review, testing, and analytics delivery standards.

Merative

SENIOR DATA SCIENTIST

Jul. 2022 - Mar. 2023

- Led HIPAA-compliant deidentification work across 200M+ patient records, supporting privacy, security, and audit-readiness goals.
- Built automated ETL testing and regression frameworks to detect schema drift, transformation defects, and data fidelity issues.
- Supported HITRUST readiness by following data governance and security protocols in a regulated healthcare environment.
- Managed enterprise integration across 70+ data sources, improving mapping consistency, reducing rework, and strengthening data review processes.
- Developed large-scale migration validation analysis across 150B+ patient records.
- Created knowledge-driven documentation and mentoring programs that improved delivery quality and reduced rework.

IBM/Explorys

SENIOR DATA SCIENTIST

Jun. 2015 - Jul. 2022

- Contributed to IBM data governance tiger-team efforts by developing standards, review processes, documentation patterns, and reusable curation practices.
- Managed multi-organization integration across 70+ interconnected data sources, strengthening source-to-target consistency and mapping quality.
- Developed data validation and review processes that reduced total rework by 25% and mapping rework by 45%.
- Led data migration validation analysis across 150B+ patient records and supported clinical data integration for 100B+ structured and semi-structured records.
- Created 125+ knowledge base articles and curated workflow documentation to improve onboarding, standards adoption, and delivery quality.
- Managed 12 remote data science contractors across 36 integration projects, coordinating delivery expectations, review practices, and quality standards.
- Built AI and advanced analytics solutions, including surgical scheduling optimization, COVID-19 hospitalization prediction, NLP/topic modeling, and smart clinical workflow tools, supported by governed healthcare data foundations.

AmTrust Financial

SOFTWARE ENGINEER

Mar. 2014 - Jun. 2015

- Served as principal developer for a new P&C insurance product and two major architecture initiatives.
- Improved performance across 65+ ISO rating workflows and added unit testing to reduce deployment risk.

Education

PGCert., Data Science Professional

PGCert., Data Science

Master of Science, Astrophysics

IBM

Johns Hopkins University

University of Cincinnati
