About Me

I am a seasoned data professional with over 10 years of experience in data science, engineering, and analytics, specializing in the healthcare industry. My expertise lies in building and optimizing data pipelines, curating healthcare data, and leveraging cloud-based technologies to drive business intelligence and reporting. Most recently, I have been working on designing a scalable data warehouse to power BI analytics and Tableau dashboards, using dbt, AWS Glue, and Redshift to transform and automate data workflows. I thrive in dynamic environments where innovation, collaboration, and efficiency are key to success.

Why MacroHealth?

MacroHealth's mission to revolutionize healthcare data infrastructure resonates deeply with me. Throughout my career, I have worked on projects that enhance the accessibility and quality of healthcare data, ensuring organizations can derive meaningful insights to improve patient outcomes. Your emphasis on scalable cloud solutions and data-driven decision-making aligns perfectly with my experience in AWS, Redshift, and dbt-driven transformations. Additionally, MacroHealth's values—teamwork, integrity, and forward-thinking—match my own approach to problem-solving and innovation.

Why Me?

With my extensive background in Python, SQL, and cloud-based data solutions, I am confident in my ability to contribute to MacroHealth's data engineering initiatives. I bring hands-on experience building robust ETL/ELT pipelines, implementing scalable data architectures, and ensuring data integrity within healthcare ecosystems. My ability to collaborate across teams—including engineers, analysts, and business stakeholders—ensures that technical solutions align with strategic business goals. Beyond technical skills, I am a proactive problem solver with a passion for continuous learning, always striving to optimize processes and deliver impactful results.

I would welcome the opportunity to discuss how my skills and experience align with MacroHealth's needs. Please feel free to reach out to schedule a conversation. Thank you for your time and consideration—I look forward to the possibility of joining your team.
