## Summary

---

Experienced Data Engineer with a strong track record of delivering scalable health data pipelines across cloud platforms, automating validation processes, and documenting workflows.

## Experience

---

### Health Data Movers

*AWS: S3, Snowflake, SQLMesh, Python, SQL, Docker*

#### DATA CONSULTANT

*Mar. 2025 - Present*

Developed a reusable ETL pipeline to streamline data onboarding for a healthcare revenue cycle platform.

- Developed SQLMesh models for ingesting and transforming payer and RCM data in Snowflake.
- Designed and built reusable ETL pipelines to support revenue cycle integrations, reducing onboarding time.
- Mapped complex healthcare data schemas from Practice Suite into Adonis' data model.
- Created testable, modular SQLMesh models, reducing regression errors and accelerating iteration cycles.
- Standardized and documented transformation logic across clients in order to cut onboarding documentation.
- Established validation and audit checkpoints (e.g., row counts, null checks, referential integrity).
- Translated business requirements into technical specifications to improve delivery predictability.
- Built detailed integration playbooks to be used as the internal standard for onboarding new vendors and partners.

### Arkos Health

*AWS: S3, Athena, Redshift, Glue, dbt, PySpark, Docker + AWS CLI, Tableau, Jupyter*

#### SENIOR DATA ENGINEER

*Jun. 2023 - Jan. 2025*

Built a scalable AWS data lake with automated CI/CD, metadata reporting, and integrated analytics tools.

- Designed and implemented an AWS data lake, improving data retrieval times by 50%.
- Automated CI/CD, reducing deployment times by 50% and increasing success rates by 15% over the past year.
- Created metadata reports, reducing troubleshooting time by over 90% and enhancing workflow transparency.
- Integrated Jupyter into reporting, boosting report interactivity and increasing stakeholder satisfaction by 30%.
- Created comprehensive data lake documentation, reducing onboarding time for new team members by 40%.
- Implemented Jira and GitHub, enhancing task tracking and team coordination by 25% within three months.
- Enhanced cross-departmental collaboration, increasing data-driven decision-making by 15% in six months.
- Mentored junior team members, improving their performance metrics by 30% in six months.
- Led goal-setting sessions, improving goal alignment and tracking accuracy by 30% in the first quarter.
- Initiated stakeholder feedback sessions, improving deliverable relevance and accuracy by 25% in three months.

### Merative

*Azure: Data Factory, Blob Storage, Functions, SQL DB, Synapse Analytics, Python, DevOps*

#### SENIOR DATA SCIENTIST

*Jul. 2022 - Mar. 2023*

Launched a new Azure platform to replace HDFS systems to modernize data infrastructure.

- Led HIPAA-compliant deidentification initiative across 200+ million patient records.
- Designed and implemented an automated testing framework for ETL pipelines for validation coverage.
- Validated and optimized Azure-based data workflows, ensuring continuity and fidelity during the transition from legacy HDFS systems to cloud architecture.
- Conducted end-to-end system testing for Azure Data Factory pipelines, Blob Storage configurations, and downstream Synapse integrations.
- Collaborated with engineering teams across disciplines to refine architectural designs.
- Documented test plans and platform migration procedures for improving onboarding for future QA engineers.
- Built regression test suites and data comparison tools, detecting schema drift and transformation errors early in the development lifecycle.
- Ensured compliance with data governance and security protocols to reduce audit risks and support HITRUST readiness.

**ADVISORY DATA SCIENTIST**

Nov. 2021 - Jul. 2022

Built AI tools while leading analytics delivery and large-scale data validation efforts.

- Created AI Surgical Scheduling Optimization tool currently evolving into new offering.
- Led delivery on tailored analytics and reporting project for client administrative data.
- Developed data migration validation analysis on 150+ billion patient records.
- Developed surgical smart case card using combined CNN/RNN model.

**SENIOR DATA CURATION ARCHITECT**

Dec. 2020 - Nov. 2021

Led large-scale clinical data and NLP initiatives and delivering ML solutions.

- Developed clinical data integration of 100+ billion structured & semi-structured records.
- Developed topic modelling project on nearly 6 million semi-structured provider notes data.
- Curated 25 pages of workflow documentation and mentored new hires in AI tuning process.
- Created COVID-19 hospitalization prediction tool with Machine Learning algorithms.

**DATA CURATION ARCHITECT**

Nov. 2017 - Dec. 2020

Led enterprise data integration initiatives and mentoring programs.

- Managed multi-org enterprise integration with over 70 interconnected data sources.
- Developed new data validation and review process that reduced total rework by 25%.
- Reduced mapping rework by 45% with through new knowledge-driven initiatives.
- Led mentoring program to increase 4,500 billable hours over two year period.

**SOFTWARE DEVELOPER**

Sep. 2016 - Nov. 2017

Developed internal resources that reduced costs and improved onboarding efficiency.

- Reduced time spent on knowledge transfer by 80% by rewriting project documentation.
- Eliminated need for a \$30,000 annual contract by developing data curation tool.
- Reduced cost-per-hire by \$5,210 by re-developing education program.

**DATA SCIENTIST**

Nov. 2015 - Sep. 2016

Led integration efforts and process automation initiatives.

- Managed team of 12 remote data science contractors for 36 integration projects.
- Created over 125 new knowledge base articles, making up 30% of the team's online content.
- Developed automated data integration tool to cut out 28% unnecessary development time.

**Explorys**

Hadoop/HDFS: Ruby, Pig, React, NodeJS, JavaScript, SQL, Oracle, Jenkins

**DATA SCIENTIST**

Jun. 2015 - Nov. 2015

Built ETL pipelines on distributed data systems to support clinical data integration and population analytics.

- Developed cron-based widget to define blackout periods for client data pulls.
- Performed troubleshooting on production issues across multiple environments.
- Principal integration specialist for 10+ client database warehouses.

**Other Experience**

ADJUNCT PROFESSOR, **Multiple Institutions**, Aug. 2010 - May. 2019.

SOFTWARE ENGINEER, **AmTrust Financial Services**, Mar. 2014 - Jun. 2015.

COLOR SCIENTIST, **PPG Industries**, Apr. 2012 - Jun. 2013.

**Education**

2022 **PGCert.**, Data Science Professional

IBM

2015 **PGCert.**, Data Science

Johns Hopkins University

2010 **Master of Science**, Astrophysics

University of Cincinnati

2004 **Bachelor of Fine Arts**, Printmaking

Ohio University
