(216) 556-1612

Summary

Healthcare Data Consultant with 10+ years of experience leading the technical delivery and governance of analytics, data platforms, and ML solutions across clinical, operational, and revenue-cycle domains. Combines hands-on expertise in Python, SQL, Snowflake, SQL Server, AWS, Azure, and production data pipelines with leadership in data quality, source-to-target reconciliation, documentation, and shared standards. Skilled at turning ambiguous healthcare challenges into trusted analysis, reusable data models, real-time services, and stakeholder-ready reporting supported by testing, CI/CD, and observability. Known for aligning engineering, data science, operations, and business stakeholders while establishing transparent, scalable, and well-governed solutions for regulated environments.

Core Skills

SQL & Data Platform

Snowflake, SQL Server/T-SQL, stored procedures/views, query tuning/indexing, SQL/Jinja, dbt, SQLMesh

Analysis & Reporting

Ad hoc analysis, complex joins and aggregations, reconciliation, Python/pandas, Jupyter, Excel/pivot tables, Power BI, Tableau

Healthcare Data

Revenue cycle, payer and eligibility data, JSON/XML/EDI, FHIR, HL7, EHR/EMR, HIPAA, HITRUST, clinical and financial data

Delivery & Governance

Stakeholder intake, client reporting, root-cause analysis, QA, GitHub, Jira/Azure DevOps, audit logs, documentation

Experience

HHaEXchange

HEALTHCARE DATA INTEGRATION CONSULTANT — CONTRACT VIA VEERSA TECHNOLOGIES

Oct. 2025 - Jun. 2026

Led healthcare source analysis, data-quality investigation and Snowflake modeling to produce trusted, standardized datasets for reporting and downstream use.

- Led source analysis and Snowflake/dbt delivery that converted operational healthcare data into standardized, analytics-ready models.
- Built reusable SQL/Jinja logic for lifecycle fields, null handling, sentinel dates and source-system variations across organization, office, caregiver and patient data.
- Developed QA suites for duplicates, nulls, referential integrity and reconciliation; analyzed failing source and target records to isolate discrepancies, quantify affected records and identify root causes.
- Assessed source structures and implementation constraints, working with client and internal stakeholders to clarify ambiguous business rules, define scope and establish clear, consistent and repeatable onboarding standards.

Adonis

HEALTHCARE REVENUE CYCLE DATA CONSULTANT — CONTRACT VIA HEALTH DATA MOVERS

Mar. 2025 - Jul. 2025

Translated payer and revenue-cycle source data into standardized Snowflake models for repeatable client onboarding and reporting.

- Developed Snowflake/SQLMesh models for payer and revenue-cycle data, translating client requirements and source schemas into analysis-ready datasets.
- Built reusable transformations and validation checkpoints for row counts, nulls, referential integrity, and reconciliation.
- Added schema-drift detection, audit logs, CI checks, and deterministic recovery procedures to reduce regression risk and improve trust in delivered data.
- Produced mapping specifications and integration playbooks that made client onboarding logic transparent, repeatable and easier to review.

GrowData Analytics

INDEPENDENT DATA AUTOMATION & ANALYTICS CONSULTANT

Sep. 2024 - Oct. 2025

Built a document-to-data product that converted semi-structured invoices into validated, auditable transaction records.

- Built an OCR-to-analytics workflow that converted handwritten and printed invoices into structured transactions using cross-field validation, reconciliation and confidence-based exception handling.
- Produced audit logs, error taxonomies and usage reporting to investigate extraction failures, manage retries and improve processing reliability.

Arkos Health

SENIOR DATA ANALYST

Jun. 2023 - Jan. 2025

Delivered healthcare analytics, recurring reporting and data-quality investigations while improving the governed data foundation used by the BI team.

- Reconciled membership and demographic reporting discrepancies by isolating differences in extraction criteria, eligibility rules, distinct-member logic and duplicate handling; translated findings into stakeholder-ready BI reports.
- Established a governed repository for scheduled reports, ad hoc queries, tests and notebooks; introduced shared review standards, documented analytical methods and mentored analysts on collaborative delivery.

Merative

SENIOR DATA SCIENTIST

Jul. 2022 - Mar. 2023

Led data validation, compliance and migration assurance for a regulated healthcare platform modernization.

- Built automated ETL regression and data-comparison tests that detected schema drift, transformation defects and fidelity issues during migration from legacy HDFS systems to Azure.
- Led HIPAA-compliant deidentification and validation across more than 200 million patient records, supporting HITRUST readiness and reducing audit risk.

IBM

Advanced through five roles delivering healthcare analytics, client integration, data-quality improvement and large-scale migration validation.

SENIOR DATA SCIENTIST

Nov. 2021 - Jul. 2022

- Led delivery of tailored analytics and reporting for client administrative data, translating business requirements into validated analytical outputs.
- Developed migration-validation analyses covering more than 150 billion patient records, identifying data-fidelity issues before production transition.

SENIOR DATA ARCHITECT

Dec. 2020 - Nov. 2021

- Led integration of more than 100 billion structured and semi-structured clinical records for downstream analytics and application workflows.
- Applied NLP and topic modeling to nearly six million provider notes, extracting patterns from unstructured clinical text and documenting reusable analytical workflows.

DATA ARCHITECT

Nov. 2017 - Dec. 2020

- Developed standardized data-validation and review processes that reduced client-validation rework by 25% and mapping rework by 45%.
- Partnered with Client Delivery and engineering teams to investigate data and application discrepancies across a 73-organization healthcare network, tracking findings in Jira, clarifying source logic and coordinating fixes through production.

EARLIER ROLES

Jun. 2015 - Nov. 2017

- Coordinated delivery across 46 client data-integration projects and managed 12 remote contractors, establishing expectations for reviews, quality and issue resolution.

Education & Credentials

2010 **Master of Science** Astrophysics

University of Cincinnati

2015 **Certificate of Specialization** Data Science

Johns Hopkins University

2022 **IBM Data Science Professional Certificate**

IBM
